

# INSTRUCTIONS FOR SPEED RING 2720

Fits Norman LH2 and LH52 heads (200B and 400B)

## Mounting the Speed Ring to the head:

- 1- Remove the Norman stand adapter from the bottom of the head by loosening the hex nut and turning counter clockwise.
- 2- For stand mounting (photo A) – Slide the Speed Ring over the rear of the head with the squared off slot on the ring to the bottom. Insert the ¼-20 threaded stud on the Norman stand adapter through the center hole in the bottom of the Speed Ring and into the ¼-20 threaded hole in the bottom of the head.
  - To use the Manfrotto Stand Adapter (#3850) requires a ¼-20 x 13/4" bolt (not included). Thread the bolt through the back side of the female brass insert (supplied with #3850) and tighten. Then mount to lamp housing as described above.
- 3- For camera bracket mounting (photo B) – Insert the supplied ¼-20 thumbscrew through the mounting hole on the camera brackets flash arm and insert into the ¼-20 threaded hole in the bottom of the head.

## Parts List:

- 1- 27201000 Fiberglass Speed Ring for LH2
- 1- 27205100
- 27205200 — ¼-20x3/4" T-Screw
