

2795 INSTRUCTIONS FOR CANON 540-EZ

For use with Canon TTL Shoe Assembly

There are two ways to assemble the ring:

STAND MOUNTING - Photo Number 1

Mount the slotted bracket as shown in photo number one. Use the round, 10mm long bracket screw to mount the bracket to the brass 1/4-20 threads in the Speed Ring. For the Canon, slide the TTL extension cable through the slot in the bracket and attach to shoe mount. For Nikon SC-17 you can use the slot for tension relief. The whole unit can now be attached to a Bogen or similar stand adapter via the 3/8" threads in the bracket screw.

CAMERA BRACKET MOUNTING - Photo Number 2

Same as above, except use the 10mm long bracket screw to mount the TTL shoe to the slotted mounting bracket. And the 15mm long bracket screw to mount the camera bracket to the Speed Ring assembly.

PARTS LIST:

1- 26303000 accessory shoe w/o registration

1- 23501000 4.84 Speed Ring

1- 26104300 Roll Pin

1- 27902100 Rubber Pad

1- 27952000 TTL Mounting Bracket

2- 38105000 1/4 - 20 X 7/16" Thumb Screw
