Instructions - F2X Triolet Kits

Chimera’s New F2X Triolet Lightbank Kits are complete and ready to use, right out of the box! As indicated in the chart below, every F2X Triolet Kit comes with the appropriate number of lights to produce even, beautiful light.

Suggested Installation For Triolets
On each of the light support arms, mount one Triolet in any position using the supplied Chimera Stand Adapter. Positioning the light with the lamp pointing up helps divert heat away from the lamp body. You can use mogul base lamps with either 500 or 1000 watt ratings (lamps not supplied with kit). Run the light cables over the support arms above and out to the sides to connect to your main power cable. We suggest consulting an electrician for evaluating your power needs.
