- The 5/8" diameter tubing is shock-corded together for easy transport.
- To support the frame on a light stand with the standard 5/8" stud, a 2.5" grip head is required. The grip head can be mounted at any of the pinned areas.
- To mount the grip head please see the photos below.
- The fabrics attach to the frame via the elastic corners, attach one corner at a time until the fabric is completely stretched over the frame.
