

# CHIMERA

PERFECT LIGHTING FOR

**CHIMERA Speed Rings** provide a wide range of options to support K5600 Lighting Fixtures.

200W and 400W fixtures are compatible with our polycarbonate rings, while the aluminum rings (AL) are suited for all wattages.

Chimera's unique quick release Speed Ring (QR) offer unparalleled ease of lightbank assembly.

Our line of standard accessory rings are engineered to fit most common standard accessory diameters for attachment to Alpha fixtures or the front of the K5600 Joker-Bug Beamer and Zoom Beamer reflectors.

**CHIMERA OctaPlus** presents a unique series of light shapers for the creative image maker.

Available in 3, 5, and 7 foot front diameters, the OctaPlus can be further customized with fabric grids. The OctaPlus 57 with a 7-Foot front diameter, attaches to existing OctaPlus 5 as an expansion.

When paired with Multi-Bug adapter manufactured by K5600, four Joker-Bug 200, 400, or 800 fixtures can be inserted into one OctaPlus 5 or OctaPlus 57.

Shown: Grip Head Adapter #3770 for mounting rings into 2.5" grip heads

Chimera is also excited to produce a custom line of products to outfit the Alpha series of fixtures from K5600, in Shallow and OctaPlus sizes.

With larger lightbanks on Joker-Bug fixtures, the optional Grip Head Adapter is highly recommended. This allows the speed ring to be mounted to any standard grip head, relieving the weight of the bank from the fixture.
