Erie, Colorado – September 2017
Introducing Chimera's New Lanterns for the Arri Skypanel S30 and S60.

Chimera, the worldwide leader in photographic and motion picture Lightbanks, introduces the new *Lanterns for the Arri Skypanel S30 and S60* at IBC Friday, September 15 – Tuesday, September 19, 2017 ARRI booth: 12 F 21

The lanterns will feature beautiful omnidirectional lighting from the popular Arri Skypanels. Chimera lanterns are recognized for their ease of use and this lantern is no different. These lanterns provide easy control when placing light fixtures overhead. The included skirt easily attaches to enable control over the beam and spill. The skirt can be rolled up or down using the zippers and Velcro on all four sides to vary the beam spread from an omnidirectional source.

The Chimera Lanterns for the Arri Skypanels are available exclusively through Arri and their authorized dealers.

As is with all Chimera Lightbanks, the lanterns are 100% handcrafted in the USA.
