5 April 2018
FOR IMMEDIATE RELEASE

NAB, Las Vegas, NV – Chimera Lighting in partnership with LiteGear is excited to launch its newest product; the Panel Lantern, Powered by LiteGear. A portable LED Lighting solution that combines the innovative LiteGear LED technology with the tried and true reliability of Chimera Lightbanks. The Panel Lantern packs a whole lot of versatility in a very portable package.

Based on Chimera's innovative and proven Panel Frame System the Panel Lantern is more than just a lantern; it gives users a portable, compact, reliable, and multipurpose light fixture. The Panel Lantern can be used in studio for simple fill light, yet is easily transportable for on location and run-and-gun applications.

The LiteGear LED engines feature high CRI and TLCI (>95) and are CCT adjustable from 2600K to 6000K and uses LiteGear's field proven, reliable flicker free dimming control.

The Panel Lantern is available as a kit which includes the LED head unit, a 24"x24" collapsible Chimera Panel Frame, Lantern Fabric, dimmer, 12 ft. head power cable and power supply. The kit fits into a compact 16x28x3" (406x711x76 mm) ballistic bag and weighs less than 6 lbs (2.7kg), which equals ultimate portability. Use the optional Skirt Kit to allow masking or downlighting.

Rigging options for the Panel Lantern include the specially designed 2.5" Matthews/Chimera Grip Head (3750), or Panel Clamp kits (3760), which allows the Panel Lantern to be placed on a stand or a boom or dead hung.

The Panel Lantern will be shipping in June 2018. Stop by Chimera Lighting's booth C4749 at NAB for a demo.
