Tech Bulletin

LANTERN FOR ARRI SKYPANEL S30 AND S60

CHIMERA LIGHTING is excited to announce the newest addition to its lantern range: Lanterns designed specifically for the ARRI SkyPanel S30 and S60.

The Chimera lanterns for ARRI SkyPanel S30 and S60 feature the same high quality fabrics and materials found in their TECH series of products.

Chimera Lanterns are recognized for their ease of use and this Lantern is no different. These lanterns provide easy control when placing light fixtures overhead. The included skirt easily attaches to enable control over the beam and spill. The skirt can be rolled up or down using the zippers and Velcro on all four sides to vary the beam spread from an omnidirectional overhead source to a straight downlight.

Complete Kits include:

- Lantern and Support Poles
- Lantern Skirt
- Universal Mounting Bracket
- Storage Sack
