## OCTA

Chimera's patented Octaplus Lightbanks are the ultimate in creating a beautiful broad light. The Octaplus 57 Lightbank converts from 5-foot to 7-foot, with an extension, giving the option of two sizes in one unit. The graduated internal baffle provides evenly dispersed soft light and the soft silver interior helps create a highly efficient and even light spread with rounded highlights. A 3-foot Octaplus is also available. All sizes are compatible with strobes and there is also a high heat version which can accommodate up to 4000 watts.

The Chimera Octa 24 and Octa Beauty 30 create stunning light - the kind of gorgeous light you want for those commercial beauty headshots and portraits. Our Center Bounce Disc reflects the "raw" light from the source into a soft white interior.

### Key Features:

- Soft interior for efficient light output and diffusion
- Optimal size and shape for beautiful, wrapping light
- Slim profile design
- Center-weighted inner baffle to evenly disperse light output
- Durable fabric body hand-sewn in Colorado, USA
- Aluminum poles for long lifetime of performance
