Tech Bulletin

PL100 / Panel Lantern Kit

In partnership with LiteGear and based on Chimera's innovative, proven Panel Frame System, the Panel Lantern is more than just a lantern; it gives users a portable, compact, reliable and multipurpose light fixture. The Panel Lantern can be used in studio for simple fill light, yet is easily transportable for on location and run-and-gun applications.

- Perfect for ENG, still photography and small set lighting
- Powered by Litegear LED Engines
- Use with or without lantern fabric
- High CRI & TLCI >95
- CCT adjustable: 2600K to 6000K
- Litegear's field proven flicker free, reliable dimmer control
- Strong 24" x 24" Panel Frame backbone
- Optional Skirt Kit available
- Unlimited rigging options using Chimera grip heads or Panel Clamps
